*   Comment. (The tabulation probably includes only the passenger cars used in express trains, fast trains and passenger trains. The rolling stock of the Berlin interurban railroad system as well as the luggage vans, mail vans and railroad service cars are not covered by the report. According to the last tabulation of passenger cars, dated 15 July 1951, there were 6,032 serviceable and 1,063 non-serviceable passenger cars available in the zone. ▬▬▬▬▬▬. The slight difference between the figures of the two tabulations is probably the result of repair work performed in the meantime.)
